EDUCATION

• Bachelor of Technology in Computer Science and Engineering Aug 2023 – Aug 2027
Vellore Institute of Technology CGPA: 8.34

TECHNICAL SKILLS

Languages: C++, JavaScript, HTML5/CSS3
Databases & Tools: MongoDB, Supabase, MySQL , REST APIs , JWT Authentication
Frameworks & Libraries: React.js, Node.js, Express.js, OpenAI APIs

PROJECTS

TruthLens – AI Media Verification | Express.js, Node.js, React, Tailwind | truuuthlens.vercel.app/

- Engineered a full-stack AI media verification platform to analyze news claims and cross-reference media content against trusted online sources.
- Combated digital misinformation by providing users with automated, objective truth evaluations, certainty scores, and sentiment bias detection.
- Developed robust RESTful APIs with Node.js and Express to drive AI search capabilities, implementing secure JWT authentication and MongoDB for persistent search history.
- Designed a responsive React frontend, integrating Recharts to visualize dynamic verification charts and bias meters across multiple themes.

ProjectCamp - Project Management Platform | React, Node.js, Express, MongoDB, REST APIs | project-management-application-

- Developed a comprehensive full-stack project management application enabling teams to organize hierarchical tasks, track real-time velocity, and manage project scopes seamlessly.
- Engineered a secure backend architecture using Node.js and Express, implementing JWT-based authentication with secure cross-domain cookies, email verification pipelines, and Role-Based Access Control (RBAC).
- Designed complex MongoDB aggregation pipelines and RESTful APIs to efficiently handle nested project data, member assignments, and robust file attachment uploads.
- Built a highly responsive and intuitive React frontend using Tailwind CSS, featuring contextual modals, optimistic UI updates, and streamlined task-board workflows for an exceptional user experience.

Engram – Persona-Based AI Journal | React, Node.js, Express, MongoDB, REST APIs | engram-teal.vercel.app/

- Developed a full-stack AI journaling application that enables users to interact with distinct digital personas for tailored daily reflections.
- Enhanced personal journaling and mental well-being by delivering interactive, empathetic, and personalized AI responses to user entries.
- Built the backend infrastructure using Node.js, Express, and MongoDB to securely manage user entries and persona configurations, integrated with REST APIs for dynamic AI generation.
- Crafted an intuitive, responsive React interface to seamlessly facilitate user-persona chat interactions and streamline journal management.

ACHIEVEMENTS & CERTIFICATIONS

Semi-Finalist – Economic Times GenAI Hackathon **June 2026**
Engineered an innovative GenAI solution competing against thousands of participants.
Competitive Programming – Active on LeetCode & Codeforces **Nov 2025 – Aug 2026**
Achieved LeetCode Knight Badge (1883 Peak) and Codeforces Rating (1188 Peak).
Oracle OCI AI Foundations Associate – Oracle **Aug 2025**
Demonstrated core proficiency in fundamentals of AI concepts and their integration in Full-Stack development.
