EDUCATION

• Bachelor of Technology in Computer Science and Engineering Aug 2023 – Aug 2027
Vellore Institute of Technology CGPA: 8.34

TECHNICAL SKILLS

Languages: C++, JavaScript (ES6+), HTML5/CSS3
Frameworks: React.js, Node.js, Express.js, Tailwind CSS
Databases & Tools: MongoDB, Supabase, MySQL, Git, Postman, RESTful APIs
AI & LLM Integration: LangChain, Google Gemini API, OpenAI API, RAG, Vector Search (Pinecone)

PROJECTS

LeetBuddy – CP Analytics & AI Mentor | *React 19, Express.js, MongoDB, Pinecone, Gemini API* | leet-buddy-six.vercel.app/

- Built a developer analytics platform by engineering a GraphQL ingestion engine to aggregate live contest telemetry across 40+ DSA topics, standardizing performance metrics into structured DB schemas.
- Formulated diagnostic algorithms to compute split-time autopsies and cumulative +5m penalty overheads (*Panic Tax*), reducing diagnostic evaluation time for recurring contest errors by 40%.
- Architected an end-to-end RAG copilot leveraging LangChain, Pinecone vector database (768-dim embeddings), and Google Gemini API, delivering sub-second, context-aware coding remediation.
- Implemented secure JWT authentication with HTTP-only cookies and compound MongoDB indexing, deploying on Vercel Edge with automated heartbeat pings to ensure 99.9% uptime with zero cold starts.

CricScript AI – Content Writer Agent | *React, Node.js, Express, Gemini 2.5, Tavily API* | cricscript-ai.onrender.com/

- Developed a full-stack web application that researches cricket matches and generates structured, 1,000-word video documentary scripts with visual scene cues.
- Integrated Tavily Search API with Gemini 2.5 to retrieve and cross-verify ball-by-ball scorecards and commentary, preventing LLM hallucinations with real match data.
- Prompt-engineered multi-turn generation supporting English and Hinglish commentary modes with customizable storytelling tones (dramatic, analytical, hype).
- Built RESTful APIs using Node.js and Express, implementing PDFKit for one-click script downloads, tiered rate limiting, and secure CORS headers on Render.

Engram – Persona-Based AI Journal | *React, Node.js, Express, MongoDB, RESTful APIs* | engram-teal.vercel.app/

- Built an interactive journaling platform enabling multi-turn chat with adaptive digital personas modeled directly on users' daily thoughts and reflection tone.
- Integrated Pinecone vector search to retrieve relevant past journal entries, providing long-term memory for contextual and personalized LLM responses.
- Developed RESTful endpoints using Node.js, Express, and MongoDB with JWT authentication, ensuring secure user data isolation and fast response times.
- Created an intuitive frontend with real-time state synchronization and Markdown support for seamless diary logging and fluid chat interactions.

ACHIEVEMENTS & CERTIFICATIONS

Semi-Finalist – Economic Times GenAI Hackathon **June 2026**
Built an autonomous agentic GenAI application competing against top university teams.
Competitive Programming – LeetCode Knight (1883 Peak) & Codeforces (1188 Peak), solving 400+ **Nov 2025 – Present**
problems.
Oracle Cloud Infrastructure 2025 Generative AI Certified Professional – Oracle **Oct 2025**
Certified in LLM architectures, RAG systems, and AI agent orchestration.
